SUBJECT INDEX

(Volume 19)

amino acid pentacyanoferrate 119
aminoacetonitrile 133
ammonia 109
amphile 21
AppA 165
ascorbic acid 119
autopoesis 633

bisulfite 95

carbodiimide 165, 609
carbon dioxide 109
carbonaceous
  chondrite 561
  meteorite 21
carboxylic acids 109
catalysis 143
  heterogeneous 87
chemical potential 87
citric acid 603
clay 153, 165, 609
codons 621
coenzyme A 69
cometary grain 87
comets 87
  impact 39, 87
  organic compounds 39
  origin of life 39
  particles 39
conservation 187

degeneracy rule 621
dehydrogenases, evolution 119
deoxyribonucleotide oligomers 609

earth, sterilization 549
evolution
  amino acid 187
  level 187
  mutations 187
  proteins 187
  rate 187

fatty acids 69
ferrocyanide 119
Fischer-Tropsch synthesis 561

gamma irradiation 109
genetic code 57, 69, 621
glyceraldehyde-3-phosphate 179
glycerate-3-phosphate 179
glyceric acid 7
glycerol-3-phosphate 179
glycine 133
  amide 133
glycolysis 179
Gordon Conference 1990 653

hydrogen
  bonding 153
  sulfide 95
hydrophobicity 621
hydrothermal vents 83
hypercycle 87

iminodiacetic acid 133
iminodiacetonitrile 133
impacts
  influence on origin of life 549
information theory 57
isotopes
  carbon 561
  deuterium 561
  nitrogen 561
ISSOL Meeting 1989 1, 83

lipoic acid 69

membranes 21
meteorite 87
meteorite bombardment 83
methyleneaminoacetonitrile 133
micelles, reverse 633
Miller-Urey synthesis 561
minerals 573
mixed-valence hydroxides
  anion exchange capacity 573
  catalysis 573
  properties 573
  structure 573
molecular complementarity 179
montmorillonite 609
  copper (II) 153, 165

nucleotide binding 153, 165
polynucleotide binding 153
Murchison meteorite 21
mutations 57, 621

N-(carbamoyl)glycine 133
N-(cyanomethyl)glycineamide 133
N-(cyanomethyl)glycine 133
NADH 119
nucleotides
oligomers 3
pyrophosphate linked 3

oligomers 109
origin of life, time 549
orthophosphate 143
oxalacetic acid 603
ozone 95

pApA 165
particle coalescence 39
phosphodiester bond 619
phosphoenolpyruvate 143
photochemical reactivity 573
photolysis 603
poly (U) 3, 153, 165
polyglyceric acid 7
polymerization 7
primitive
atmosphere 95
metabolism 69
organisms 57
probability matrices 187
process, nonequilibrium 87
publication bibliography 199
pyrophosphate 143
pyruvate dehydrogenase 69

quasi-species 57

racemization 7
radicals 109
ribozymes 547
RNA
catalysis 547
enzymes 69
prebiotic synthesis 165
world 83

self-organization 87
self-replication 179
self-reproduction 633
succinic acid 603
sulfite 95
sulfur 95
dioxide 95

template directed synthesis 3
transphosphorylation 143

ultraviolet 603
ultraviolet radiation 95
urea 109
